

08/08/2025

Single head rising blade trimming machine, for extruded profiles and flat sheets made of aluminium. The especially rugged structure allows very sharp and accurate cutting in order to obtain exactly parallel faces of the profiles. Furthermore the machine can be set-up with support roller conveyors to extend its versatility. The blade guard has been designed and developed to ensure working under the best possible conditions of safety.

Adjustable stop

Referring to the centreline of the blade, it allows the area to be removed to be quickly defined.

**Graduated scale** 

It allows the height of the blade relative to the horizontal support surface to be mechanically fixed in relation to the thickness of the material to be sectioned.

**Cutting zone** 

The sturdy and wide horizontal castiron support surface makes up the work area, which features a large footprint that enables the processing of both profiles and flat aluminium sheets.

## TKE 335 R / SINGLE HEAD CUTTING-OFF MACHINES

08/08/2025

1,5

BLADE	
Made of Widia (mm)	Ø = 350
BLADE FEED	
Maximum trimming height (mm)	120
CUTTING AREA PROTECTION	
Local, manually adjusted	•
LUBRICATION SYSTEM	
Micro-mist lubrication system with water and oil emulsion	•
MOTOR	
Three-phase brakemotor	•
Brake intervention time (s)	10

Power (kW)

Included • Available O
